

RAINBOW WIZARD'S BREW

The basic recipe for this is originally from [The Usborne Big Book of Science Things to Make and Do](#). I found it on this website: <https://babbledabledo.com/20-science-projects-for-preschoolers/>. Check it out!

Ingredients:

- Baking Soda
- [Liquid Watercolors](#) or Food coloring
- Glitter
- Dishsoap
- Vinegar
- Glass jar
- Small plastic containers
- Tray

Instructions:

Fill the jar halfway with vinegar, then add a few drops of one color of [liquid watercolor](#)/food coloring and some glitter. Squeeze in some dish soap, stir, and place the jar on a tray. Now have your child add in a heaping teaspoon of baking soda, stir again, and watch the foaming begin! The soap makes it foam rather than fizz. To keep the reaction going continue adding baking soda and vinegar when the foam starts to slow. To make it change colors, add a tablespoon of vinegar mixed with one color of liquid watercolor/food coloring every so often. Make sure to dump the colored vinegar into the center of the brew.

Tip: Stir It! My kids discovered that the more they stirred the mixture the faster and crazier the reaction!
