

Just For Fun

Numbers upside down can be letters....

Try these three examples.

Type in 317537 and turn upside down --you have the name of Mrs. Dahl's best friend in elementary school.

For a friendly greeting-

Enter 6.2×6.2 ,

add .23,

divide by 50

Or a nice breakfast?

Multiply 17×2

then multiply by 1000

divide by 6

Throw away the part to the right of the decimal

Subtract 3
